Staff

MICHAEL D. LEWIS
Manager

GAIL PRESLEY
Secretary

As you may recall, the Department of Water Resources has proposed a pump facility for your property to improve water management and offset the impact of reduced channel water quality. One of the conditions of this installation is that your exterior levee system be intact and up to standards. Inspections by Department personnel several years ago indicated the levee was not up to par at that time.

The Department is now kicking their facilities development into high gear, and would like to complete this phase of the overall program by the end of next year. We would like to know if the requisite work has been done, and, if not, when completion can be expected. District and Department representatives would then like to inspect the site to check for conformance before proceeding further with the project.

Please let me know the status of the situation at your earliest convenience.

Sincerely,

/s/

MICHAEL D. LEWIS
Manager
